

# BARDPRO Wall

- Performance Throughout the Life Span of the Concrete
- 100% Positive Placement
- Designed to Hold a 6" Slump
- Improves Form Finish

"Every builder should be made aware of the potential labor savings and every owner and specifying engineer aware of the superior end product such a mix provides. Strength and durability combined with ease of placement and consolidation is a real win-win and another step forward in building efficiently with structural concrete."

- Larry McCabe, McCabe Construction

**Want to make sure you are using the right mix for your next Wall pour?**

**Just say "Go BARDPRO!"**

BARDPRO is designed by YOU, the customer, using the latest in technology and resources.

**Designed for your needs:**

- Designed to hold a 6" slump, BARDPRO provides the slump you need.
- Designed to ensure yield after placement.
- Improves your form finish and reduces shrinkage.
- Mixture designed to change with the temperature.
- You can rest assured knowing that BARDPRO mixtures are closely monitored and will be verified for conformance to strength and yield.

It's all included when you say "Go BARDPRO."
