

The Material Now app puts real-time job site and performance data in your hands. Each icon on the home screen links to valuable information from your concrete provider.

Jobs

- **Find all orders** in list, map, or address views.
- **Order address & number** of the closest jobsite to you (based on phone location settings).
- **Order Status** indicates if the current order on the screen is active or on hold.
- **Volume shipped** shows how many yards have been delivered of the total yardage in the order.
- **Job Site** (black icon) pinpoints the job site location.
- **Truck icons** indicate each truck's physical location. Different colors tell the status of each truck.
- **Truck details** show when trucks are on the way, what they're doing at the jobsite, and how long they've been there.
- **Order details** include all tickets, weather stamp, timeline of the entire order, delivery graph, performance data, and more.

Summary (Web view shown below)

- **Overview** of daily progress, updated in real time. Track concrete deliveries by the hour.
- **Status** breakdown - active, on hold, or will call.
- **Top** projects, orders, and work types of the day.
- **Interactive calendar** shows concrete ordered for each day.

Performance (available for Supervisors and Admins)

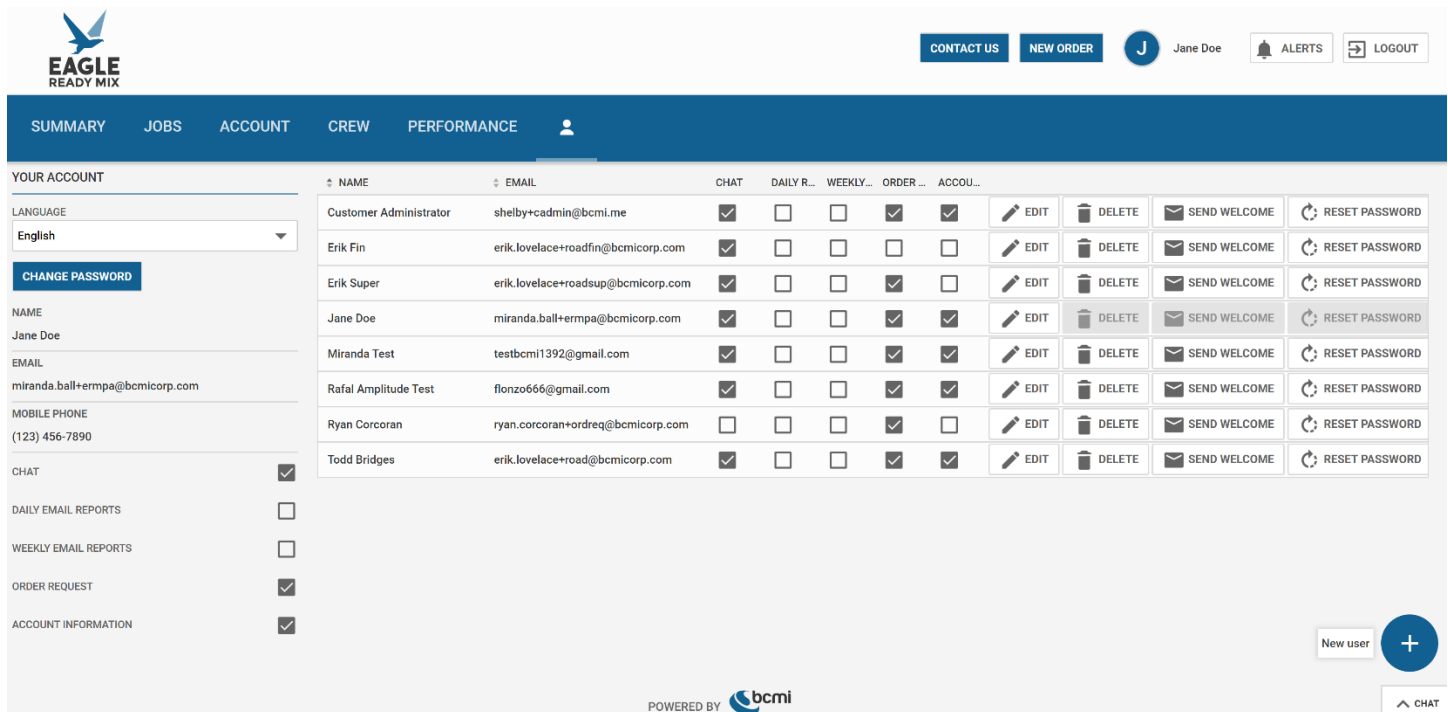

- **Performance metrics** display company-wide KPIs in a single screen.
- **Filter** to view performance by Customer, Project, Work Type or Crew.

Optional features

Anyone who uses the Material Now app can take advantage of the following features:

- **Set custom alerts** to receive updates on orders by email, on your mobile device, or both.
- **Change password** with the click of a button in the User section of the app.
- **Contact your concrete provider.** Select the Contact Us button when needing to speak directly to the concrete producer.
- **Account data** shows outstanding balance, account statement & current invoices (where available).

Designated Customer Administrators can create, edit, or remove user accounts.
